MILD CLEANING BATH FOR ALL COINS

#318851

This cleaning bath can be used to remove dirt from all types of coins. It is especially suitable for cleaning Australian decimal coins and other coins containing different metals or alloys. This bath does not remove oxidation and it will not chemically alter the coins' metal.

Instructions for use:

1. Dip coins (several maybe dipped at once) for 10 to 15 minutes depending on how soiled they are.
2. Stubborn dirt should be gently removed with a soft brush (toothbrush with natural bristles), before dipping again.
3. After dipping, rinse thoroughly with clean water
4. Pat dry carefully with a soft, clean cloth.
5. Do not rub dry.

USE TO CLEAN

All coins

CAUTION

Keep out of reach of children.

Contains according to European Union Law (EUR-LEX):

Regulation (EC)648/2004: <5% anionic surfactants, scents, linalool, hexyl cinnamal, butylphenyl methylpropional.
